

2008 Excellence in Home Design

MODULAR HOME | OVER 4,001 SQ.FT.

Manufacturer: Epoch Homes | *Builder: Modular Concepts*

While there are whole neighborhoods of colonial McMansions in Fairfield County, CT, Cara and Terry Ganser wanted a more in-scale Arts-and-Crafts style for their new modular home. The builder and manufacturer found an innovative solution by lining up five modules side by side on the first floor, and another five stacked on top. Not only did the Gansers save money over site building, but they moved into their home in half the time it would have taken to build on site—with less disruption to the existing neighborhood.
